

## PRESS RELEASE

### Solaris in Wrocław again

Bolechowo, 01.10.2019

**Solaris Bus & Coach S.A. has just begun delivering 17 modern low-floor city buses for the carrier DLA (Lower Silesian Bus Lines) from Wrocław. Four Solaris Urbino 12 and thirteen vehicles with a length of 10,5 meters will soon be seen on the streets of the capital of the Lower Silesia Voivodship.**

According to the agreement signed in May this year, four 12-meter MAXI class buses and six Solaris Urbino 10,5 buses will be delivered first from the Poznań factory. The remaining 6 pieces of shorter vehicles will be collected by DLA at the beginning of October.

All vehicles will be equipped with dynamic 186 kW engines meeting the stringent Euro VI D emission standards and equipped with an energy recuperation system that will reduce fuel consumption. In addition, they will feature a "cold start" function that facilitates starting at temperatures reaching -20 degrees Celsius. The carrier will allocate new buses partly for the service on the city lines in Wrocław and transportation between the city and towns in the Miękinia commune.

The low-floor Solaris vehicles ordered by Lower Silesian Bus Lines will be equipped with many amenities for travelers. They will feature, among others efficient air conditioning system, passenger information system with voice announcement of stops and USB sockets for charging mobile devices. The 12-meter version will provide a ride for at least 80 passengers, including 29 in seating positions. In turn, Solaris Urbino 10,5 can accommodate more than 65 passengers at a time, 24 of them will be able to travel seated. A manufacturer from Bolechowo guarantees a high level of security for the vehicles supplied, equipping them with, to name a few fire detection system, video monitoring both inside and outside the buses, and a closed-type driver's cab.

The vehicles delivered to DLA will not be the first buses from the Bolechowo-based factory to appear on the streets of Wrocław. There are already over 60 of them in the capital of Lower Silesia; however, it will be the debut of the latest version of the Urbino model.

##### About our company

Solaris Bus & Coach sp. z o.o. is a leading producer of city and intercity buses in Europe. It focuses on the development of low-emission and zero-emission vehicles, i. e. electric and hydrogen buses as well as trolleybuses. Over 25,000 Solaris vehicles have been delivered so far and they ply the streets in 850 towns and cities across 33 countries located throughout Europe as well as beyond it. Solaris is part of the Spanish CAF Group (Construcciones y Auxiliar de Ferrocarriles) S.A. From conception, to the design and manufacturing phases, all Solaris buses are produced in Poland. All activities undertaken by the company are in line with its mission, which is reflected in the brand's promise: to change the image of public transport. Solaris also actively partners with public transport operators and provides them with comprehensive

support in their transition to zero-emission mobility. Solaris products have been repeatedly awarded for quality and innovation. The Urbino 18 hydrogen bus has won the prestigious 'Bus of the Year 2025' title.
