

## PRESS RELEASE

### Electric Solaris buses will go to Paks in Hungary

Bolechowo, 19.11.2019

**The city of Paks, located in the central part of Hungary, ordered 10 zero-emission electric buses from Solaris. The signed contract concerns the delivery of six Solaris Urbino 12 electric vehicles and four 8.9 meter long electric buses with five stationary chargers.**

Six Urbino 12 electric and four Urbino 8.9 LE electric will be delivered to Hungary within 11 months of signing the contract. The total contract value, including electric buses with five stationary chargers and after-sales service of the contract, amounted to EUR 4.7 million.

According to the submitted offer, the 12-meter Solaris Urbino 12 electric vehicles will accommodate nearly 70 people on board, 28 of them in seating positions. The vehicles will be equipped with modern air conditioning with a roof heating function. There will also be USB ports mounted in the passenger compartment, thanks to which passengers will charge their mobile devices. At the ordering party's request, the Polish manufacturer will also install a passenger information system, which will include directional boards and internal LED displays, video monitoring system, fire detection and extinguishing system and driver's cabin of a closed type.

The ecological electrobuses will be driven by a 160 kW central traction motor. The energy necessary to drive it will be stored in Solaris High Energy batteries with a total capacity of 250 kWh. It will be supplemented via a plug-in connector.

The smaller of the ordered electrobuses will share a similar standard of equipment. They will provide a travel for over 40 people, including 24 seated. The manufacturer from Bolechowo will also use a 160 kW central engine to drive them. The Urbino 8.9 LE electric will be equipped with 200 kWh Solaris High Energy batteries which will be charged using a plug-in connection.

The first electric buses in the city of Paks are also the first electric buses delivered by Solaris to Hungary. To date, the Polish manufacturer has already delivered almost 150 vehicles to the Republic of Hungary, including nearly 100 trolleybuses. Most of them went to the capital of the country, Budapest. Thanks to the signed contract, Hungary has become the 18th European country to which the manufacturer from Bolechowo will supply Urbino electric battery buses.

##### About our company

Solaris Bus & Coach sp. z o.o. is a leading producer of city and intercity buses in Europe. It focuses on the development of low-emission and zero-emission vehicles, i. e. electric and hydrogen buses as well as trolleybuses. Over 25,000 Solaris vehicles have been delivered so far and they ply the streets in 850 towns and cities across 33 countries located throughout Europe as well as beyond it. Solaris is part of the Spanish CAF Group (Construcciones y Auxiliar de Ferrocarriles) S.A. From conception, to the design and manufacturing phases, all Solaris buses are produced in Poland. All activities undertaken by the company are in line with its mission, which

is reflected in the brand's promise: to change the image of public transport. Solaris also actively partners with public transport operators and provides them with comprehensive support in their transition to zero-emission mobility. Solaris products have been repeatedly awarded for quality and innovation. The Urbino 18 hydrogen bus has won the prestigious 'Bus of the Year 2025' title.
