

## PRESS RELEASE

# Solaris Bus & Coach showcases hydrogen bus at AGIR Fair 2023

Bolechowo / Biarritz, 14.06.2023

**Europe's leading manufacturer of zero-emission buses, Solaris Bus & Coach, is presenting its hydrogen bus at AGIR 2023. As one of the most important international events dedicated to sustainable mobility solutions, the fair attracts industry professionals, decision-makers and experts eager to learn about the latest developments in green transport. The hydrogen-cell-powered Urbino 12 hydrogen bus is one of the vehicles representing the manufacturer's extensive zero-emission portfolio.**

Solaris Bus & Coach is present at AGIR 2023, one of the largest international events dedicated to sustainable mobility solutions. Taking place from 13 to 15 June 2023 in Biarritz in France, the fair brings together industry professionals, decision-makers and experts to explore the latest developments in green transport. Solaris will be showcasing the innovative Urbino 12 hydrogen bus, which has been attracting unwavering attention from transport operators interested in the transformation to zero-emission transport.

The Urbino 12 hydrogen bus is powered by a 70 kW fuel cell that generates electricity onboard using hydrogen as fuel. With water and heat as the only by-products of the chemical reaction, the vehicle operates completely emission-free. Combining the advantages of electric propulsion, hydrogen buses offer a long range on a single refuelling. The bus can cover a minimum of 350 km on a full tank, and the filling process takes approximately 10 minutes, depending on the infrastructure. The use of hydrogen as a fuel source ensures efficient and quiet operation, contributing to a cleaner and quieter urban environment.

Solaris Bus & Coach has been present in the French market since 2003, having delivered over 600 buses to date. The company, represented by Solaris France, offers the widest range of zero-emission buses in Europe, providing innovative and environmentally friendly solutions to meet the growing demand for sustainable public transport. Solaris' investment in the French market underscores its commitment to reducing emissions and promoting green mobility solutions in the country.

AGIR 2023 attendees are invited to visit the company's 108 booth to talk about the latest public transportation solutions and their contribution to sustainable public transportation.

#### About our company

Solaris Bus & Coach sp. z o.o. is a leading producer of city and intercity buses in Europe. It focuses on the development of low-emission and zero-emission vehicles, i. e. electric and hydrogen buses as well as trolleybuses. Over 25,000 Solaris vehicles have been delivered so far and they ply the streets in 850 towns and cities across 33 countries located throughout Europe as well as beyond it. Solaris is part of the Spanish CAF Group (Construcciones y Auxiliar de Ferrocarriles)

S.A. From conception, to the design and manufacturing phases, all Solaris buses are produced in Poland. All activities undertaken by the company are in line with its mission, which is reflected in the brand's promise: to change the image of public transport. Solaris also actively partners with public transport operators and provides them with comprehensive support in their transition to zero-emission mobility. Solaris products have been repeatedly awarded for quality and innovation. The Urbino 18 hydrogen bus has won the prestigious 'Bus of the Year 2025' title.
