

## PRESS RELEASE

# Solaris to carry out the biggest order for hydrogen buses in Europe

Bolechowo, 11.09.2023

**The municipal public transport operator TPER in the city of Bologna is going to purchase as much as 130 hydrogen buses. These zero-emission vehicles will be supplied by Solaris. The delivery will encompass 127 units of 12-metre Urbino 12 hydrogen buses for TPER Bologna and 3 units for TPER Ferrara. The carrier shall also have the right to extend the order by an additional 140 vehicles as an option.**

The Italian cities of Bologna and Ferrara have just started one of the largest projects encompassing hydrogen fuel cell buses in Europe. Undoubtedly, this impressive order of 130 hydrogen-powered vehicles will bring the city closer to achieving its ambitious goal of transforming urban public transport to entirely zero-emission one by 2030. Bologna and Ferrara have opted for Solaris Urbino 12 hydrogen buses, which, today, are one of the most popular hydrogen-powered buses Europe-wide. The contract allows for extending the order by an additional 140 vehicles.

Each bus will feature an innovative hydrogen system that fulfils the highest safety standards. The 70 kW fuel cell will derive hydrogen from five composite tanks placed on the bus roof. With the full tanks that can hold 37.5 kg of hydrogen, the bus will be able to cover about 350 km.

The inhabitants of Bologna and Ferrara will see for themselves the benefits of the Urbino 12 hydrogen buses as early as in 2024 when the first batch of 37 hydrogen units will be delivered to the city. The rest of the vehicles will arrive in 2025-2026.

Solaris is a European e-mobility leader, including in the production of hydrogen buses. So far, the company has delivered over 120 hydrogen-powered units to a dozen or so clients in 8 countries. In 2022, Solaris extended its hydrogen offer by an articulated Urbino 18 hydrogen bus.

#### About our company

Solaris Bus & Coach sp. z o.o. is a leading producer of city and intercity buses in Europe. It focuses on the development of low-emission and zero-emission vehicles, i. e. electric and hydrogen buses as well as trolleybuses. Over 25,000 Solaris vehicles have been delivered so far and they ply the streets in 850 towns and cities across 33 countries located throughout Europe as well as beyond it. Solaris is part of the Spanish CAF Group (Construcciones y Auxiliar de Ferrocarriles) S.A. From conception, to the design and manufacturing phases, all Solaris buses are produced in Poland. All activities undertaken by the company are in line with its mission, which is reflected in the brand's promise: to change the image of public transport. Solaris also actively partners with public transport operators and provides them with comprehensive support in their transition to zero-emission mobility. Solaris

products have been repeatedly awarded for quality and innovation. The Urbino 18 hydrogen bus has won the prestigious 'Bus of the Year 2025' title.
