

PRESS RELEASE

More Solaris e-buses to go to Sweden

Bolechowo, 28.09.2023

The Swedish carrier VR Kristianstad has signed a contract for the delivery of 23 Solaris e-buses. The order comprises 20 low-entry Urbino 15 electric buses and 3 low-floor Urbino 12 electric units. These will be the first ever zero-emission Solaris buses in Kristianstad.

Solaris Bus & Coach has just signed another contract for the supply of electric buses. The Swedish town of Kristianstad has joined the long list of towns and cities investing in zero-emission transport. As part of the contract, the carrier VR has ordered a total of 23 e-buses from the Solaris Urbino family, including 20 Urbino 15 LE electric and 3 Urbino 12 electric units. The addition of these new and technologically-advanced vehicles to the fleet marks a milestone in eliminating harmful emissions and improving air quality in the town. Solaris will deliver the ordered vehicles as early as in July next year.

The Urbino 15 LE electric is an electric bus designed to run on both city and intercity routes. The vehicle will feature batteries with a capacity of over 550 kWh providing for maximum autonomy and efficiency. The Urbino 12 electric bus is, in turn, the most popular low-floor city electric model in the zero-emission range of Solaris. The 12-metre bus will be fitted with batteries with a capacity of over 400 kWh. The energy storage units of both models will be charged with a power output of 130 kW via a plug-in connector.

Vehicles for Kristianstad will be accessible for passengers with limited mobility. Onboard both the Urbino 15 LE electric and the Urbino 12 electric, the carrier has provided two ramps for passengers with disabilities, as well as seats that are accessible directly from the low floor. An additional feature of the vehicles will be LED RGB lighting, which will allow the color to change to green, giving the interior a modern look. Passengers and driver safety will be ensured by a monitoring system and the eMirror solution, which involves cameras mounted in place of traditional mirrors, significantly improving visibility while operating the vehicle.

The Solaris brand has consolidated its position as a European leader for zero-emission solutions in public transport. Kristianstad will be another Swedish destination to boast battery-powered buses manufactured by Solaris. "Every new city that decides to invest in zero-emission Solaris vehicles is another token of trust and the best proof of the high quality of our products. We are very pleased to be a partner in transforming local public transport to become more sustainable" said Olivier Michard, Member of the Management Board for Sales, Marketing and After Sales at Solaris Bus & Coach sp. z o.o.

About our company

Solaris Bus & Coach sp. z o.o. is a leading producer of city and intercity buses in Europe. It focuses on the development of low-emission and zero-emission vehicles, i. e. electric and hydrogen buses as well as trolleybuses. Over 25,000 Solaris vehicles have been delivered so far and they ply the

streets in 850 towns and cities across 33 countries located throughout Europe as well as beyond it. Solaris is part of the Spanish CAF Group (Construcciones y Auxiliar de Ferrocarriles) S.A. From conception, to the design and manufacturing phases, all Solaris buses are produced in Poland. All activities undertaken by the company are in line with its mission, which is reflected in the brand's promise: to change the image of public transport. Solaris also actively partners with public transport operators and provides them with comprehensive support in their transition to zero-emission mobility. Solaris products have been repeatedly awarded for quality and innovation. The Urbino 18 hydrogen bus has won the prestigious 'Bus of the Year 2025' title.
