

PRESS RELEASE

Szczecin, Poland expands its fleet with 14 Solaris electric buses

Bolechowo / Szczecin, 06.11.2024

The City of Szczecin has ordered 14 electric buses from Solaris. The order includes the Urbino electric model in two lengths: four 12-meter Urbino 12 electric buses and ten articulated Urbino 18 electric buses.

Representatives of the City of Szczecin and Solaris Bus & Coach signed an agreement today for the purchase of 14 zero-emission buses. The order includes the Urbino electric model in two lengths: four 12-meter Urbino 12 electric buses and ten articulated Urbino 18 electric buses. The vehicles will be operated by Szczecin's public transport company, Szczecińskie Przedsiębiorstwo Autobusowe "Klonowica" sp. z o.o. With their modern features and high-level equipment, these buses will enhance the comfort and safety of drivers and passengers. Upon delivery, Szczecin will have 30 Solaris electric buses in its fleet.

Both the Solaris Urbino 12 electric and 18 electric models will be equipped with a central electric motor and Solaris High Energy batteries, which feature high energy density and capacity, ensuring a long range on a single charge. The batteries will be charged using both pantograph and plug-in chargers.

The Solaris Urbino electric buses will be equipped with full-vehicle air conditioning, electric heating, Wi-Fi access, monitoring systems, and an integrated driver alcohol detection system for driver and passengers safety. The onboard monitoring will be integrated with the city's Central Urban Transport Management System. Additionally, to support daily operations and monitor onboard processes, the buses will connect to eSConnect, Solaris's dedicated system for fleet management.

Szczecin continues to invest in a modern and eco-friendly bus fleet. In recent years, the city has purchased 16 Solaris electric buses. With the completion of today's contract, this number will increase to 30 zero-emission e-buses.

About our company

Solaris Bus & Coach sp. z o.o. is a leading producer of city and intercity buses in Europe. It focuses on the development of low-emission and zero-emission vehicles, i. e. electric and hydrogen buses as well as trolleybuses. Over 25,000 Solaris vehicles have been delivered so far and they ply the streets in 850 towns and cities across 33 countries located throughout Europe as well as beyond it. Solaris is part of the Spanish CAF Group (Construcciones y Auxiliar de Ferrocarriles) S.A. From conception, to the design and manufacturing phases, all Solaris buses are produced in Poland. All activities undertaken by the company are in line with its mission, which

is reflected in the brand's promise: to change the image of public transport. Solaris also actively partners with public transport operators and provides them with comprehensive support in their transition to zero-emission mobility. Solaris products have been repeatedly awarded for quality and innovation. The Urbino 18 hydrogen bus has won the prestigious 'Bus of the Year 2025' title.
