

PRESS RELEASE

Poznań, Poland expands its fleet of electric Solaris buses

Bolechowo / Poznań, 15.01.2025

The city of Poznań in the western region of Poland is once again investing in zero-emission public transport. On 13 January this year, MPK Poznań and manufacturer Solaris Bus & Coach have signed a contract to purchase 9 articulated electric buses, with an option to expand the order by an additional 8 vehicles. The final order covers a total of 17 Solaris Urbino electric articulated buses. MPK Poznań already operates more than 300 Solaris buses, including 58 electric and 25 hydrogen-powered vehicles.

Representatives of MPK Poznań, the city's public operator, and Solaris Bus & Coach have signed a contract for the delivery of 17 articulated electric buses, each 18 meters long. The delivery is scheduled for the second quarter of 2026.

Each 17 ordered articulated buses will accommodate at least 110 passengers, who will enjoy a comfortable ride in modern, quiet, air-conditioned interiors. The fully emission-free drive of the Solaris Urbino electric is powered by an air-cooled asynchronous motor and next-generation Solaris High Energy batteries, known for their high energy density. This configuration ensures long driving ranges, with overnight depot charging via plug-in chargers after daily operations.

The first electric Solaris buses appeared on Poznań's streets in 2019. Since then, MPK's fleet has grown by 58 battery-powered Solaris buses and 25 hydrogen-powered vehicles. To date, Solaris has produced over 2,800 e-buses. Some of the largest fleets of Solaris battery buses include ATM Milan (275 Urbino electric), Unibuss Oslo (183 Urbino electric), Warsaw (152 Urbino electric), and BVG Berlin (133 Urbino electric).

About our company

Solaris Bus & Coach sp. z o.o. is a leading producer of city and intercity buses in Europe. It focuses on the development of low-emission and zero-emission vehicles, i. e. electric and hydrogen buses as well as trolleybuses. Over 25,000 Solaris vehicles have been delivered so far and they ply the streets in 850 towns and cities across 33 countries located throughout Europe as well as beyond it. Solaris is part of the Spanish CAF Group (Construcciones y Auxiliar de Ferrocarriles) S.A. From conception, to the design and manufacturing phases, all Solaris buses are produced in Poland. All activities undertaken by the company are in line with its mission, which is reflected in the brand's promise: to change the image of public transport. Solaris also actively partners with public transport operators and provides them with comprehensive support in their transition to zero-emission mobility. Solaris products have been repeatedly awarded for quality and innovation. The Urbino 18 hydrogen bus has won the prestigious 'Bus of the Year 2025' title.
