

PRESS RELEASE

Solaris debuts in another European country

Bolechowo / Sarajevo, 25.03.2025

The Ministry of Transport of the Canton of Sarajevo ordered 10 articulated trolleybuses from Solaris. The delivery of the Trollino 18 vehicles is scheduled for mid-2026. With this order, Bosnia and Herzegovina will join the impressive list of 36 countries with Solaris vehicles.

Representatives of the Ministry of Transport of the Sarajevo Canton and Solaris Bus & Coach have signed a contract for the purchase of 10 Trollino trolleybuses, each 18 meters long. These modern, zero-emission, and quiet trolleybuses will be delivered to Sarajevo in mid-2026. The procurement tender for these trolleybuses was conducted and financed in collaboration with the European Investment Bank (EIB).

In addition to traditional trolleybus drives, the articulated Trollino 18 for Sarajevo will be equipped with batteries, allowing them to cover distances of up to 20 km without connection to the overhead catenary system.

With this order, Bosnia and Herzegovina will join the list of countries where Solaris' modern buses and trolleybuses serve urban transport systems. Until recently, this list included 33 countries, but in the past few months, the United States and Canada have been added. Bosnia and Herzegovina will become the 36th country to incorporate Solaris vehicles into its modern and sustainable public transport system.

To date, Solaris has delivered more than 5,500 zero-emission vehicles, including battery-electric buses, hydrogen buses, and trolleybuses. Solaris is the European market leader in trolleybuses. In 2024, the company held more than 60% of the market share and, to date, has delivered nearly 2,500 trolleybuses to customers in 70 cities. The largest single order completed so far was last year's delivery of 100 Trollino 12 trolleybuses to Bucharest.

About our company

Solaris Bus & Coach sp. z o.o. is a leading producer of city and intercity buses in Europe. It focuses on the development of low-emission and zero-emission vehicles, i. e. electric and hydrogen buses as well as trolleybuses. Over 25,000 Solaris vehicles have been delivered so far and they ply the streets in 850 towns and cities across 33 countries located throughout Europe as well as beyond it. Solaris is part of the Spanish CAF Group (Construcciones y Auxiliar de Ferrocarriles) S.A. From conception, to the design and manufacturing phases, all Solaris buses are produced in Poland. All activities undertaken by the company are in line with its mission, which is reflected in the brand's promise: to change the image of public transport. Solaris also actively partners with public

transport operators and provides them with comprehensive support in their transition to zero-emission mobility. Solaris products have been repeatedly awarded for quality and innovation. The Urbino 18 hydrogen bus has won the prestigious 'Bus of the Year 2025' title.
