

PRESS RELEASE

Mobility Move 2026: Solaris presenting Urbino 10,5 electric with modular drive

Bolechowo, 11.03.2026

Mobility Move 2026, one of Europe's key trade fair shows dedicated to sustainable public transport, has been underway since yesterday in Berlin. Solaris is presenting its newest zero-emission bus – the Urbino 10,5 electric. The model is developed around the manufacturer's modular drive concept and was recently recognised with the Sustainable Bus Award 2026.

Mobility Move 2026 takes place from 10 to 12 March in Berlin, bringing together representatives from the public transport sector for three days of presentations, networking, and knowledge exchange.

At stand no. 39, Solaris showcases a zero-emission model Solaris Urbino 10,5 electric – a compact midibus designed for routes where a standard 12-metre vehicle is not always the optimal solution. With a length of 10.5 metres, the model combines manoeuvrability with high passenger capacity and full operational performance.

The vehicle is built on Solaris' modular drive concept, enabling efficient integration of drive components and eliminating the traditional engine tower. This architecture maximises the available passenger space and allows the bus to carry up to 85 passengers, including up to 33 seated – one of the highest capacities in the midibus segment. A turning radius of under 17 metres makes the Urbino 10,5 electric particularly well suited for dense urban areas, historic city centres, and feeder routes.

Powered by a 240 kW electric motor and high-energy batteries with a capacity of up to 400 kWh, the bus can operate for a full day without intermediate charging. The model supports both plug-in and pantograph charging solutions and complies with the latest GSR2 safety standards and can also be equipped with additional driver assistance systems. The bus is fitted with an energy-efficient CO₂ heat pump. Solaris Urbino 10,5 electric generates zero local emissions and reduced noise levels, contributing to improved air quality and enhanced comfort in urban environments.

We invite you to visit our stand No. 39 in the exhibition hall of the Estrel Hotel in Berlin from 10 to 12 March 2026.

About our company

Solaris Bus & Coach sp. z o.o. is a leading producer of city and intercity buses in Europe. It focuses on the development of low-emission and zero-emission vehicles, i. e. electric and hydrogen buses as well as trolleybuses. Over 25,000 Solaris vehicles have been delivered so far and they ply the streets in 850 towns and cities across 33 countries located throughout Europe as well as beyond it. Solaris is part of the Spanish CAF Group (Construcciones y Auxiliar de Ferrocarriles) S.A. From conception, to the design and manufacturing phases, all Solaris buses are produced in Poland. All activities undertaken by the company are in line with its mission, which

is reflected in the brand's promise: to change the image of public transport. Solaris also actively partners with public transport operators and provides them with comprehensive support in their transition to zero-emission mobility. Solaris products have been repeatedly awarded for quality and innovation. The Urbino 18 hydrogen bus has won the prestigious 'Bus of the Year 2025' title.
