

PRESS RELEASE

Nobina places an order for a total of 103 electric buses

Bolechowo, 23.04.2026

Solaris has signed further contracts with Nobina. The agreements cover the delivery of a total of 103 Solaris Urbino 15 LE electric. The zero-emission vehicles will operate routes in the regions of Stockholm, Göteborg, and Skåne. Deliveries are scheduled for 2027.

The Scandinavian public transport operator Nobina is once again expanding its bus fleet in Sweden with Solaris vehicles. The latest contracts mark another significant orders placed by Nobina over the past two years. This time, the operator has ordered a total of 103 Solaris Urbino 15 LE electric buses under three separate contracts. Deliveries of the low-entry e-buses are scheduled for mid-2027. 50 vehicles will operate in the Stockholm region, 49 will serve in the Skåne region, and 4 in the vicinity of Göteborg.

"The contract for 103 electric buses ordered by Nobina marks another important milestone in the development of sustainable bus transport in Sweden. Choosing the Urbino 15 LE electric means choosing zero emissions, but above all, comfort. We are very proud that Nobina has once again placed its trust in us, and we look forward to further developing our existing partnership," said Sverre Skaar, CEO of Solaris Sverige AB.

The Urbino 15 LE electric buses are designed for both urban and suburban transport. Each vehicle ordered by Nobina will be equipped with modern high-capacity Solaris High Energy batteries, ensuring a sufficient range for routes extending beyond urban areas.

Solaris has been cooperating with Nobina continuously since 2010. In recent years, the Scandinavian transport operator has been steadily expanding its zero-emission fleet in Sweden. Since 2024, Solaris has delivered a total of 201 electric buses to Nobina. In 2026 and 2027, the manufacturer will deliver a total of over 320 electric vehicles to the operator. The latest orders are another confirmation of Nobina's ambitious plans to develop sustainable bus transport in both urban areas and suburban regions across Sweden.

About our company

Solaris Bus & Coach sp. z o.o. is a leading producer of city and intercity buses in Europe. It focuses on the development of low-emission and zero-emission vehicles, i. e. electric and hydrogen buses as well as trolleybuses. Over 25,000 Solaris vehicles have been delivered so far and they ply the streets in 850 towns and cities across 33 countries located throughout Europe as well as beyond it. Solaris is part of the Spanish CAF Group (Construcciones y Auxiliar de Ferrocarriles) S.A. From conception, to the design and manufacturing phases, all Solaris buses are produced in Poland. All activities undertaken by the company are in line with its mission, which is reflected in the brand's promise: to change the image of public transport. Solaris also actively partners with public transport operators and provides them with comprehensive

support in their transition to zero-emission mobility. Solaris products have been repeatedly awarded for quality and innovation. The Urbino 18 hydrogen bus has won the prestigious 'Bus of the Year 2025' title.
