

PRESS RELEASE

Solaris electric bus has started operation in Austrian city of Klagenfurt

Bolechowo, 05.07.2013

Yesterday Solaris Urbino 8,9 LE electric started operation in Klagenfurt. It is the first contract for highly innovative and emission-free vehicles completed by Polish manufacturer.

Solaris Urbino 8,9 LE electric is exceptionally quiet, technically innovative and distinguished by its modern design. Batteries are charged through plug-in system. Not only are the batteries a source of energy for drive system but also for air-conditioning, heating, power steering and electric door control. Also, for the first time CO₂ air conditioning system with a built-in heat exchanger has been installed.

Stadtwerke Klagenfurt purchased the vehicle as a part of European Union project Cemobil. Solaris electric bus performance will be observed both by the operator and the manufacturer's R&D department. On the basis of the results Stadtwerke Klagenfurt will make further decision on the extension of electric bus fleet.

Electric version of Solaris Urbino will operate on the route which runs from the city center, through the main railway station to university campus on the outskirts of the city.

Polish manufacturer's fully electric buses are gaining popularity and recognition among customers in Europe. Another three 12-metre electric buses were sold to Germany. The first customer to buy Solaris electric bus with inductive charging was Braunschweiger Verkehrs-AG. Another two were sold to Rheinbahn AG, a customer from Düsseldorf.

Additional information:

Solaris is a leading European manufacturer of Solaris Urbino city buses, Solaris Trollino trolleybuses, Solaris InterUrbino intercity buses, special buses and Solaris Tramino urban rail vehicles. Since THE production started in 1996, almost 10,000 buses have been produced. They run in over 500 cities in 26 countries. Solaris is a family business founded by Krzysztof and Solange Olszewski.

and hydrogen buses as well as trolleybuses. Over 25,000 Solaris vehicles have been delivered so far and they ply the streets in 850 towns and cities across 33 countries located throughout Europe as well as beyond it. Solaris is part of the Spanish CAF Group (Construcciones y Auxiliar de Ferrocarriles) S.A. From conception, to the design and manufacturing phases, all Solaris buses are produced in Poland. All activities undertaken by the company are in line with its mission, which is reflected in the brand's promise: to change the image of public transport. Solaris also actively partners with public transport operators and provides them with comprehensive support in their transition to zero-emission mobility. Solaris products have been repeatedly awarded for quality and innovation. The Urbino 18 hydrogen bus has won the prestigious 'Bus of the Year 2025' title.
