

## PRESS RELEASE

### Large order for Solaris in Norway

Bolechowo, 24.08.2016

**At the beginning of next year the number of Solaris buses operated in the capital of Norway will increase by 99 vehicles. That is how many vehicles the Polish producer has been contracted to deliver to customers operating public transport in Oslo and its suburbs.**

The first order is for 75 Urbinos of the 18.75-meter variant, to be delivered to the company Unibuss. The elongated, articulated third-generation buses will be equipped in Euro 6 engines made by DAF and compliant with the Euro 6 emissions norm. The same drive unit will be installed in 24 Urbino 12 buses of the new generation, which the firm Nobina has acquired in a tender. One of the more interesting elements of the vehicle fitting will be intercity bus seats, even though the buses themselves will be operating only within Oslo. Also the fuel type the buses will run on is innovative: it is the so-called HVO, i.e. a biofuel of the latest generation. Supplies under both contracts are to be carried out in the first quarter of 2017.

"These are large and very prestigious orders. Winning them proves that the brand of Solaris has gained the trust of customers in Norway. We are grateful for this trust and assure them that they will receive vehicles that meet both drivers and passengers expectations," commented Eberhard Wolters, managing board member in charge of sales, marketing and after sales.

There are currently 369 busses of Solaris rolling on the streets of 24 Norwegian cities. Once the delivery of Urbinos, scheduled for the beginning of next year, is completed, Norway will have 468 Solaris buses altogether, which will elevate the Polish manufacturer back to first rank among low-floor city bus suppliers to that country.

"I am naturally thrilled but also humbled for these two orders. Oslo and its suburbs are really important for our company, and this proves that we have our success-factors in terms of aftermarket, support and sales in our country. I am very proud of that Solaris will have a strong market-share in the Norwegian capital regarding city buses" added Managing Director for Solaris Norge AS, Sverre Skaar.

##### About our company

Solaris Bus & Coach sp. z o.o. is a leading producer of city and intercity buses in Europe. It focuses on the development of low-emission and zero-emission vehicles, i. e. electric and hydrogen buses as well as trolleybuses. Over 25,000 Solaris vehicles have been delivered so far and they ply the streets in 850 towns and cities across 33 countries located

throughout Europe as well as beyond it. Solaris is part of the Spanish CAF Group (Construcciones y Auxiliar de Ferrocarriles) S.A. From conception, to the design and manufacturing phases, all Solaris buses are produced in Poland. All activities undertaken by the company are in line with its mission, which is reflected in the brand's promise: to change the image of public transport. Solaris also actively partners with public transport operators and provides them with comprehensive support in their transition to zero-emission mobility. Solaris products have been repeatedly awarded for quality and innovation. The Urbino 18 hydrogen bus has won the prestigious 'Bus of the Year 2025' title.
