

## PRESS RELEASE

### 50 more eco-friendly Solaris buses heading for Sweden

Bolechowo, 03.09.2019

**Solaris has signed a contract for the supply of 50 zero-emission and low emission buses to bus operator Vy Buss AB. This Swedish carrier has decided to buy eight electric buses and 42 gas-fuelled ones.**

Ultimately, the bulk of the ordered buses (48 vehicles) will be in operation in Gävle. This Swedish town located at the Gulf of Bothnia will receive 24 Solaris Urbino 12 CNG (Compressed Natural Gas), 16 articulated Solaris Urbino 18 CNG and 8 Solaris Urbino 12 buses with an electric drive. What is more, the operator Vy Buss AB has also commissioned 2 CNG-fuelled Solaris Urbino 12 which will end up in the town of Hässleholm. In line with the awarded order, the gas-fuelled buses will be delivered in the middle of 2020, whereas the electric buses ought to be supplied in the first quarter of 2022.

“We are glad we were able to start working with the Solaris, a firm which meets expertly the requirements of X-trafik and Vy Buss AB. We receive both vehicles and ready solutions, such as for instance ten-year technical support. This means that – thanks to the cooperation with Solaris - we guarantee the best terms to ensure the satisfaction of our customers and to increase the share of public transport in our cooperation with Gävle”, said Andreas Ehrenborg, Technical Director at Vy Buss AB.

The Solaris 12 electric will be fitted with 200 kWh Solaris High Energy batteries. The energy stored in these will propel the drive axle with integrated electric engines, ensuring travel that is completely locally emission-free. There will be 28 seats onboard of each of the buses as well as two additional folding seats.

The buses running on compressed natural gas meet the rigorous European emission norm Euro 6. The Solaris Urbino 12 CNG buses will offer 31 seats, whereas the 18-metre buses will hold 45 seats (including four folding ones).

Cooperation between Solaris and the Swedish operators dates back to 2003. Since then, Solaris has supplied customers in Sweden with over 600 vehicles the vast majority of which are low or zero-emission vehicles.

##### About our company

Solaris Bus & Coach sp. z o.o. is a leading producer of city and intercity buses in Europe. It focuses on the development of low-emission and zero-emission vehicles, i. e. electric and hydrogen buses as well as trolleybuses. Over 25,000 Solaris vehicles have been delivered so far and they ply the streets in 850 towns and cities across 33 countries located throughout Europe as well as beyond it. Solaris is part of the Spanish CAF Group (Construcciones y Auxiliar de Ferrocarriles) S.A. From conception, to the design and manufacturing phases, all Solaris buses are produced in Poland. All activities undertaken by the company are in line with its mission, which

is reflected in the brand's promise: to change the image of public transport. Solaris also actively partners with public transport operators and provides them with comprehensive support in their transition to zero-emission mobility. Solaris products have been repeatedly awarded for quality and innovation. The Urbino 18 hydrogen bus has won the prestigious 'Bus of the Year 2025' title.
