

PRESS RELEASE

Solaris to fill order for six electric buses for Konin

Bolechowo, 10.09.2019

Konin will join the list of Polish cities using zero-emission electric buses of Solaris in everyday municipal transport. The value of the contract covering the purchase of six electric buses and of three chargers slightly exceeds PLN 16 million.

In line with the signed contract, the commissioned vehicles are to be delivered to the municipal operator Miejski Zakład Komunikacyjny (MZK) in Konin by the end of May 2020. Solaris also awards a 36-month warranty period for the buses and a 72-month warranty for the chargers. It is not the first time that MZK Konin chose an offer of Solaris. In 2010 and 2011, the city located in the Greater Poland province received a total of 16 Solaris Urbino buses of 10, 12 and 15 metres.

The object of the latest order are six top-notch zero-emission Solaris Urbino 12 electric buses. The vehicle driveline will consist of a drive axle with two integrated electric motors with a power of 110 kW each. The buses shall be equipped with 200 kWh Solaris High Energy batteries.

What is more, the tender Solaris has won covers also the supply of three free-standing dual plug-in-charging stations (with a power of 2x60 kW or 1x120 kW). The time needed to fully recharge the battery will take from 3 to 6 hours (for a charging power of 60 kW or 120 kW, respectively). The vehicles will also allow for the later installation of a pantograph on the vehicle roof. These solutions will make the fast charging of batteries possible in the future, both at the bus depot and at other sites in the city.

The electric buses set to roll off the assembly line in Bolechowo will contain 26 seats, 10 of which will be accessible from a low bus floor. The state-of-the-art Solaris Urbino 12 electrics will be air-conditioned and equipped with CCTV cameras. In addition, the vehicles will feature a GPS locating function.

So far, Solaris has delivered zero-emission electric vehicles to 16 Polish cities. A total of 118 zero-emission vehicles produced in Bolechowo near Poznań are driving around these cities. After completion of the latest orders - among others of 130 Solaris Urbino 18 electric buses for Warsaw and of 21 Solaris Urbino 12 electrics for Poznań - in the next few years, the number of electric Solaris vehicles in Poland will rise threefold.

About our company

Solaris Bus & Coach sp. z o.o. is a leading producer of city and intercity buses in Europe. It focuses on the development of low-emission and zero-emission vehicles, i. e. electric and hydrogen buses as well as trolleybuses. Over 25,000 Solaris vehicles have been delivered so far and they ply the streets in 850 towns and cities across 33 countries located throughout Europe as well as beyond it. Solaris is part of the Spanish CAF Group (Construcciones y Auxiliar de Ferrocarriles) S.A. From conception, to the design and manufacturing phases,

all Solaris buses are produced in Poland. All activities undertaken by the company are in line with its mission, which is reflected in the brand's promise: to change the image of public transport. Solaris also actively partners with public transport operators and provides them with comprehensive support in their transition to zero-emission mobility. Solaris products have been repeatedly awarded for quality and innovation. The Urbino 18 hydrogen bus has won the prestigious 'Bus of the Year 2025' title.
