

PRESS RELEASE

Solaris at the UITP Global Public Transport Summit in Hamburg

Hamburg/Bolechowo, 16.06.2025

At this year's UITP Global Public Transport Summit, taking place from 15 to 18 June 2025 in Hamburg, Solaris is presenting its Urbino 12 electric bus featuring a modular drive system. The company's experts also take an active part in panel discussions dedicated to the transformation of public transport.

UITP, the International Association of Public Transport, is the world's largest organization bringing together stakeholders in urban mobility. Held every two years, the UITP Summits are key industry events that gather mobility sector organizations around innovation and the future of public transport.

The 2025 edition of the UITP Summit is being held in Hamburg from 15 to 18 June. Solaris is showcasing its Urbino 12 electric bus with a modular drive system at the event. The company's experts are also involved in the congress programme, actively participating in expert debates on the future of urban mobility, including innovations in battery and hydrogen bus technology.

The Urbino 12 electric battery bus presented by Solaris at the UITP Summit is an innovative vehicle, first unveiled at Mobility Move 2024 in Berlin. Its modular drive architecture made it possible to eliminate the traditional engine tower, which resulted in increased passenger capacity while maintaining long range. This design also allows all batteries to be placed on the roof. The next-generation batteries, with a capacity of over 600 kWh, offer a range of 600 km (based on eSORT 2 testing). In addition, the Urbino 12 electric complies with the latest safety and cybersecurity standards, including the so-called GSR2 regulation. The vehicle has been awarded the prestigious Sustainable Bus Award 2025 in the "Urban" category.

We warmly invite you to visit the Solaris stand No. 120 in Hall A4 at the Hamburg Messe exhibition centre from 15 to 18 June 2025.

About our company

Solaris Bus & Coach sp. z o.o. is a leading producer of city and intercity buses in Europe. It focuses on the development of low-emission and zero-emission vehicles, i. e. electric and hydrogen buses as well as trolleybuses. Over 25,000 Solaris vehicles have been delivered so far and they ply the streets in 850 towns and cities across 33 countries located throughout Europe as well as beyond it. Solaris is part of the Spanish CAF Group (Construcciones y Auxiliar de Ferrocarriles) S.A. From conception, to the design and manufacturing phases, all Solaris buses are produced in Poland. All activities undertaken by the company are in line with its mission, which is reflected in the brand's promise: to change the image of public transport. Solaris also actively partners with public transport operators and provides them with comprehensive

support in their transition to zero-emission mobility. Solaris products have been repeatedly awarded for quality and innovation. The Urbino 18 hydrogen bus has won the prestigious 'Bus of the Year 2025' title.
