

PRESS RELEASE

Solaris to premiere Urbino 10,5 electric at Busworld 2025

Bolechowo, 17.09.2025

During the Busworld 2025 fair in Brussels, Solaris will present three zero-emission Urbino buses with modular drive. The most important event will be the world premiere of the Solaris Urbino 10,5 electric, which will take place on October 3 during the manufacturer's press conference.

Solaris will be present at the October Busworld 2025 fair in Brussels with its latest zero-emission offer. The manufacturer will showcase three buses with modular drive – the hydrogen Urbino 18 hydrogen, the electric Urbino 12 electric and – in its debut appearance – the Solaris Urbino 10,5 electric.

Completing the fleet. Perfectly.

The new, fully electric model – Solaris Urbino 10,5 electric – is another step towards expanding Solaris's offer in the segment of zero-emission solutions for public transport. The model combines manoeuvrability and stability with high passenger capacity, while offering optimal range. Moreover, the Urbino 10,5 electric is fully compatible with the entire Urbino family, which means more efficient operation and easier servicing for operators using different Solaris models in their fleets. Urbino 10,5 electric is an intelligent addition to the portfolio in the sustainable urban mobility segment.

Award-winning and reliable flagships

Also on display at the Solaris stand will be two models already well known to the public and popular among customers. The Solaris Urbino 12 electric is the brand's most popular electric bus, present in dozens of European cities. Its new design with a modern drive system and wide configuration options was awarded the title of Sustainable Bus Award 2025. The Solaris Urbino 18 hydrogen, honoured with the title of Bus of the Year 2025, is an articulated hydrogen bus. It guarantees a wide range provided by fuel cell technology combined with high passenger capacity, making it a particularly attractive solution for large cities and the most demanding routes.

Busworld 2025 will take place at Brussels Expo from October 4 to 9. Solaris will be present in Hall 5, at stand 502. The world premiere of the Solaris Urbino 10,5 electric is scheduled for October 3 during the manufacturer's press conference. During the fair, daily presentations of this model are also planned at 3:00 PM (CET). See you at Busworld 2025 in Brussels.

About our company

Solaris Bus & Coach sp. z o.o. is a leading producer of city and intercity buses in Europe. It focuses on the development of low-emission and zero-emission vehicles, i. e. electric and hydrogen buses as well as trolleybuses. Over 25,000 Solaris vehicles have been delivered so far and they ply the streets in 850 towns and cities across 33 countries located throughout Europe as well as beyond it. Solaris is part of the Spanish CAF Group (Construcciones y Auxiliar de Ferrocarriles) S.A. From conception, to the design and manufacturing phases,

all Solaris buses are produced in Poland. All activities undertaken by the company are in line with its mission, which is reflected in the brand's promise: to change the image of public transport. Solaris also actively partners with public transport operators and provides them with comprehensive support in their transition to zero-emission mobility. Solaris products have been repeatedly awarded for quality and innovation. The Urbino 18 hydrogen bus has won the prestigious 'Bus of the Year 2025' title.
