

PRESS RELEASE

MZK Toruń expands its fleet with 40 electric Solaris buses

Bolechowo, 09.06.2026

On Tuesday, 9 June, 40 Solaris Urbino 12 electric buses officially joined the fleet of MZK Toruń. Under the contract signed in May 2025, the bus manufacturer will also provide charging infrastructure.

The official handover ceremony of the 40 Solaris Urbino 12 electric buses was attended by representatives of Miejski Zakład Komunikacyjny (MZK) in Toruń and Solaris Bus & Coach. Alongside the vehicle deliveries, Solaris will provide the operator with charging infrastructure, including both plug-in chargers and pantograph chargers located at the depot and across the city, enabling fast charging. The delivery of 40 zero-emission Solaris Urbino buses has expanded the electric fleet that MZK Toruń has been gradually developing since 2022. With this latest delivery, a total of 50 fully electric Solaris vehicles will be operating on the city's streets.

"We are pleased that another 40 battery-electric buses from Solaris have joined the fleet of MZK Toruń. The new zero-emission fleet represents a continuation of the investment in sustainable public transport for the residents of the city and surrounding areas," says Mateusz Figaszewski from Solaris Bus & Coach Sp. z o.o.

The Urbino 12 electric buses delivered under the latest contract are low-floor and fully air-conditioned vehicles. Each bus has been equipped with safety systems compliant with GSR2 (General Safety Regulation 2), including a Blind Spot Information System (BSIS) for detecting cyclists in blind spots, as well as a Moving Off Information System (MOIS), which detects pedestrians and cyclists in front of the vehicle when pulling away and alerts the driver to their presence.

The cooperation between Solaris and the city of Toruń dates back to 2010. Since then, the company has delivered a total of 189 buses to the city. In recent years, the vast majority of these vehicles have been low-emission or zero-emission models.

About our company

Solaris Bus & Coach sp. z o.o. is a leading producer of city and intercity buses in Europe. It focuses on the development of low-emission and zero-emission vehicles, i. e. electric and hydrogen buses as well as trolleybuses. Over 25,000 Solaris vehicles have been delivered so far and they ply the streets in 850 towns and cities across 33 countries located throughout Europe as well as beyond it. Solaris is part of the Spanish CAF Group (Construcciones y Auxiliar de Ferrocarriles) S.A. From conception, to the design and manufacturing phases, all Solaris buses are produced in Poland. All activities undertaken by the company are in line with its mission, which is reflected in the brand's promise: to change the image of public transport. Solaris also actively partners with public transport operators and provides them with comprehensive support in their transition to zero-emission mobility. Solaris

products have been repeatedly awarded for quality and innovation. The Urbino 18 hydrogen bus has won the prestigious 'Bus of the Year 2025' title.
