PRESS RELEASE

Solaris unveils the name of its new zero-emission intercity bus platform

Bolechowo, 26.11.2026

Solaris has revealed the name of its new zero-emission bus platform designed for regional and intercity operations. The vehicles, which will make their world premiere at Busworld Brussels 2027, will be marketed under the name Internova.

Solaris Internova is the manufacturer’s new platform designed for zero-emission regional and intercity transport. **The name Internova** combines two meanings: the element "Inter" refers to the vehicle's role in connecting cities, regions and people, while "nova" symbolizes a new beginning, energy, innovation and progress. The name reflects Solaris' ambition to help shape the future of sustainable regional and intercity transport.

To meet the diverse needs of transport operators, Solaris Internova will be available in three length variants: 10.8 m, 12 m and 12.8 m. The range will include both Low Entry (LE) versions, combining passenger accessibility with a high level of travel comfort, and High Floor (HF) variants equipped with full-size luggage compartments, dedicated to regional and intercity services.

Solaris Internova has been designed from the ground up specifically for zero-emission regional and intercity transport. The bus will be available with both battery-electric and hydrogen drivetrains, addressing the growing demand for sustainable mobility solutions in the intercity market.

The vehicle's public debut is scheduled for autumn 2027 at Busworld Brussels, Europe's leading event dedicated to the bus and coach industry.

The Internova name and its associated visual identity are legally protected as registered trademarks in Poland and across the European Union.

About our company

Solaris Bus & Coach sp. z o.o. is a leading producer of city and intercity buses in Europe. It focuses on the development of low-emission and zero-emission vehicles, i. e. electric and hydrogen buses as well as trolleybuses. Nearly 30,000 Solaris vehicles have been delivered to almost 900 towns and cities across 34 countries in Europe and beyond. Solaris is part of the Spanish CAF Group (Construcciones y Auxiliar de Ferrocarriles) S.A. From conception, to the design and manufacturing phases, all Solaris buses are produced in Poland. All activities undertaken by the company are in line with its mission, which is reflected in the brand’s promise: to change the image of public transport. Solaris also actively partners with public transport operators and provides them with comprehensive support in their transition to zero-emission

mobility. Solaris products have been repeatedly awarded for quality and innovation. The Solaris Urbino 18 hydrogen bus has won the prestigious 'Bus of the Year 2025' title.
