

Solaris Bus & Coach S.A. Company – Department of Rail Vehicles is looking for suppliers specializing in production of:

1. Products of composite boards and panels of various structures. Especially: walls, roof hatches, ceiling panels, etc. made of panels consisting of two layers of aluminium and the separating core in the form of:

- aluminium honeycomb of various thickness,
- non-flammable synthetics used in railway industry,
- other non-flammable materials used in this type of solutions *

* Since each project is accompanied by various solutions aimed at optimal match with the requirements of the final customer, structural properties and the required parameters as well as demand will be agreed individually with the supplier basing on technical documentation prepared for the given project.

Requirements of Solaris Bus & Coach S.A.:

- a) experience in production of the above mentioned products using the most up to date technologies
- b) suitable European certificates and standards, and especially:
 - non-flammability certificates according to DIN5510 standard and others,
 - bonding certificates at least of class A2 or A1
- c) own engineering and design department (expertise in CAD software)
- d) flexibility and speed in implementation of modifications and new design solutions. Propositions concerning proprietary solutions in cooperation with technical office,
- e) deliveries Just In Time – according to Solaris production schedule
- f) favourable price, general trade and transport conditions
- g) will to sign Solaris Framework Sales Contract (conditions open to negotiation)

We offer:

- cooperation with one the best and fastest developing companies in rail vehicle field
- possibility of cooperation extension with regard to other elements
- long-term cooperation based on clear and honest conditions
